

Jun-En Enterprise Corp.

Metal-mesh makers, mesh-conveyor makers, barbed-wire formers, and meshes

Established in 1987, Jun-En Enterprise Corp. is an experienced manufacturer of metal-mesh making machines and meshes. The company operates a machinery plant and six factories that make metal meshes, providing the widest range of specialized services to global customers.

Jun-En supplies a complete array of machines for making expanded, punched, rhombic-grid, razor and barbed-wire, and hexagon meshes, as well as mesh-conveyor makers and associated equipment. With ample experience in design and fabrication, the firm turns out quality machines that meet diversified needs and have been exported to Japan, North America, and the EU.

Numerous models are available to meet large- or small-volume and wide-variety needs, helping customers turn out the best products at the lowest cost. Among Jun-En's products are the world's speediest expanded-mesh makers of their kind, including models that handle work of 300~3,100mm width and 10mm thickness.

With their human-machine interface, maintenance-free servomotor, and the latest material in-feed system, Jun-En's machines are the most reliable and efficient in the industry. Using the mechanical design expertise of Japanese and European partners, the firm turns out machines with design and functionality that meet international standards and are user-friendly and highly efficient, and can be maintained at very low cost.

The company plans to set up its third overseas production base in Shanghai to produce mechanical parts and metallic mesh-conveyors. About 60% of its output is currently shipped to the Americas and the Middle East; the remainder goes to Taiwan, where the firm enjoys a high market share. Already ISO 9001-certified, Jun-En constantly strives to remain competitive by enhancing product quality and management efficiency.
